I was one of our nation’s hungry kids growing up. Today, 1 in 5 children in America struggle with hunger. But when they get breakfast, their days are bigger and brighter. Learning, attention, memory and mood improve. Together, we have the power to get breakfast to kids in your neighborhood — let’s make it happen. Go to hungeris.org and lend your time or your voice.

Pulmonary hypertension puts unbearable stress on the heart. We’re putting our heart into finding a cure.

Pulmonary hypertension (PH) narrows arteries in the lungs. This puts pressure on the right side of the heart as it works extra hard to push blood through those arteries. It can cause death from heart failure, and there’s no cure. At first glance, PH can look like asthma or other less threatening diseases. And undiagnosed and untreated, the average survival time with PH is 2.8 years. But with early diagnosis, new treatments are extending life expectancy and short, gives hope to PH patients, caregivers, advocacy. At PHA there’s no breathing easy improving PH patients’ quality of life. The Pulmonary Hypertension Association, PHA for family members and medical professionals through support, education, research and until we find a cure. Learn how you can help at www.PHAssociation.org
